|------------------------------------------------------------------------------------------------------------------------------------------------|------------------|----------|
| Based on schematics and gerbers from <a href="https://github.com/konkotgit/ZX-48-Spider">https://github.com/konkotgit/ZX-48-Spider</a> Rev 1.1 |                  |          |
| Changed DIN connector to be 9 Pin, the same as ZX Max 128 and others                                                                           |                  |          |
| Moved resistors out from under chips and moved various components around to suit Kicad                                                         |                  |          |
| Used Kicad freerouter with some manual additions around 5V power routing                                                                       |                  |          |
